New Features in version DATAGOLF 2.11:

The functionalities of 2.11 are:

1. EGA Handicap System 2012-2016 compatibility

Version 2.11 is compatible with the edition of the EGA Handicap System 2012-2016

2. CBA

The “CBA” button substitutes the “CSA” button. The procedure within Datagolf is the same, with mandatory calculation at the end of the competition. The new algorithm is included in the calculations, as foreseen in the EGA Handicap System 2012-2016.

Note: Since the CBA values are inverted in relation to CSA, the values previously calculated for CSA (2007-2009) are now displayed inverted, but with no negative effect to the handicap calculations.

3. Cancelled competitions

If a competition is cancelled (Tournament status: cancelled) it is also necessary to do the CBA calculation, which will be “0” and “Reductions Only”.

4. Clause 3.16 – General Play

General Play is now named as clause 3.16 instead of clause 25.

5. 9-hole rounds

Datagolf includes the instructions foreseen in clause 3.12.15 of the EGA Handicap System 2012-2016, according to which the exact handicap cannot be reduced, through a 9-hole round, to a category which is excluded from returning 9-hole round.

6. International guests

For guests with handicap managed under other National Associations, the handicap type “Not EGA” has been substituted by “CONGU”, using the formula mentioned on decision 4.5.1 of the EGA Handicap System 2012-2016, which does not include Slope. On any situation whereby Slope is to be included on the playing handicap calculation, please use “EGA” handicap type.
